SUMMARY	
ID	UC-11
Name	Notifications Center
Goal	To inform users of vacation-related events and provide quick access to related details or actions.
Actors	Employees, Managers, HR, General Management

TRIGGERS	
Trigger	Vacation-related events occur in the system (e.g., request submission, approval, rejection, pending review, comments, attachment requirements).

PRE-CONDITIONS	
1	User has valid system access.
2	Relevant vacation transactions or actions exist in the system.

BASIC FLOW (MAIN SUCCESS SCENARIO)

#	Actor Action	System Response
1	User navigates to the Notifications Center screen.	System displays a chronological list of notifications, newest first.
2	User reviews Notification Text (Action Type, Vacation Details, Employee Name, Context).	System shows card-style notifications with clear hierarchy.
3	User clicks [View] button on a notification.	System opens the detailed view of the related vacation request.
4	User clicks the [Context Button] on a notification.	System navigates the user to the relevant section (e.g., 'My Requests' or 'Pending Tasks').
5	User takes no action.	System continues to display notifications until they are marked as read or expire based on rules.

NOTIFICATION TYPES

Type	Example Text
Approval	Annual Leave (20–25 Aug, 6 days) for Omar Abdelrahman was approved.
Rejection	Sick Leave (12–14 Sep, 3 days) for Omar Abdelrahman was rejected. Reason: No medical note.
Pending Approval	Annual Leave (18–20 Sep, 3 days) for Omar Abdelrahman is pending manager approval.
Review Notes	Reviewer Ahmed Mostafa left a note on Casual Leave (02–03 Oct): 'Please adjust dates.'
Attachment Review	Sick Leave (05–06 Oct, 2 days) for Omar Abdelrahman needs attachment review.
General Updates	General notification to stakeholders when requests are submitted, approved, rejected, or cancelled.

BUSINESS RULES

Rule ID	Description
BR-1101	System displays notifications relevant to the logged-in user's role (Employee, Manager, HR, etc.).
BR-1102	Notifications appear in reverse chronological order, newest first.
BR-1103	Employees must receive notifications upon request acceptance or rejection.
BR-1104	Approved vacation cancellations trigger notifications for both HR and the Manager.
BR-1105	When HR and Managers are notified, only the header with a link is shown; full request details are visible after clicking the link.
BR-1106	Each notification must contain text and at least one actionable button ([View] or Context).

EXCEPTIONS (ERROR CONDITIONS)

ID	At Step	Issue	Resolution
EX-1	Step 1	No notifications available.	System displays an empty state message: MSG-1101.
EX-2	Step 3	User clicks [View] but underlying request has been deleted or is inaccessible.	System shows message: MSG-1102.

POST-CONDITIONS

1	User is informed about vacation-related actions through notifications.
2	User can access related screens (detailed request or task list) directly from notifications.
3	Notifications remain available until acknowledged, expired, or cleared by system rules.

NOTES

Note	Notification cards follow a clean layout with clear text hierarchy and action buttons.
Note	System ensures contextual navigation via [View] or [Context] buttons.
Note	Notification messages are dynamically generated from request and system log data.
